Black Shadow Steel Soccer Goal

(Model: STL-643)

Rule the pitch and take your shot with the Black Shadow Steel goal from Park & Sun Sports. For over 25 years, Park & Sun Sports has designed, manufactured and distributed high quality sporting goods. We hope you enjoy this goal and get many hours of practice and play from it. A few points on your new goal:

- 6'x4'x3' size: The perfect size to set up quick and practice with.
- "C" clips for net attachment: More secure than Velcro straps, the "C" clips also allow you to adjust the tension in the net by twisting them on the frame.
- It can be used indoors or outdoors ("J" hooks provided to anchor the goal on grass surface).
- The frame is made with 1-1/2 " steel which is sturdier than most other goals on the market, and the black finish will provide protection from the elements.
- Multi-sport use.

That should just about cover it! Assembly of the goal is quick and easy, so you should be enjoying the goal in no time at all. So once again, thank you from Park & Sun Sports and HAVE FUN!

Black Shadow Steel Soccer Goal (Model: STL-643)

Parts List

#1 le	haped pole	for top	and	bottom	left side	(2)	
-------	------------	---------	-----	--------	-----------	-----	--

#2 L shaped pole for top and bottom right side (2)

#3 Straight pole uprights (2)

#4 L shaped pole for front left bottom (1)

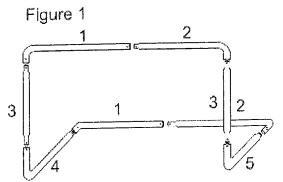

#5 L shaped pole for front right bottom (1) 🗍

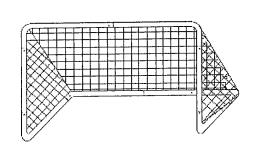

#6 Net (1)

#7 Net "C" clips (20)

#8 Ground anchors (4)

Adult Assembly and Supervision Required

1) Assemble the frame as shown in the above Figure 1. Please make sure that all the push button connections are secure before use.

2) Drape the net (#6) over the assembled frame back, placing the marked tab in the center of the top crossbar.

3) Secure the net (#6) to the goal frame, using the Net "C" clips (#7). The clips simply snap over the frame poles with the net perimeter included. Once attached, you can loosen or tighten the net tension by turning the clip around the frame poles.

4) If desired, you may use the Ground anchors (#8) to secure the base of the goal to the ground as shown in the figure below
