Dream Catcher Instructions

Materials:

- One 6 inch ring
- One 5 yard strand 2mm Stone Amy Cord
- Three feathers
- Eight 1 yard lengths of White Roving Craft Yarn
- One 3 yard strand of 4mm Pearl Bonnie Braid
- One 3 yard strand 4mm Denim Bonnie Braid
- One 3 yard strand 4mm Turquoise Bonnie Braid
- Eight 12mm wooden beads

Recommended Tools (not included):

- Permanent marker
- EZ Beader tool
- Tape
- Clear-dry glue
- Scissors

Directions:

1. In permanent marker, write your dreams and wishes on the wooden beads, then set aside.

2. Holding the 3 strands of 4mm cord together, tie the ring with a temporary knot, leaving an 18 inch tail (figure 1A).

3. Wrap the ring while holding the 3 strands together. Try to keep the cords flat; don't let them twist or overlap (figure 1A- 2A). When you get back to the beginning, untie the Overhand Knot and match the cords together by color (figure 1B). Three-Strand Braid a 10-12 inch tail (figure 2B). Tie off with an Overhand Knot and trim the excess and set any long pieces aside for decorating.

4. Tie one end of the 2mm cord to the covered ring (figure 1C). Form a web on the interior of the ring by following (figures 2C-3C). On the third web layer, add a wish bead to the strand (figure 4C) and continue web. To finish, tie a knot near the center and trim excess (figure 5C).

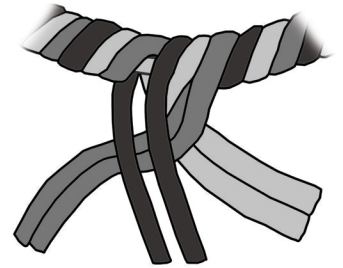

5. Decorate the catcher: tie excess strands to the catcher and thread the remaining beads here and there. Strands of cord can be attached to the ring using the Lark's Head Knot (figure 6C). Cut the white roving yarn into 1 yard lengths and distribute around the base of the ring. Braid some ends together and string on any remaining beads for added interest. Feathers can be tucked into beads and secured with glue.
