Project Idea Animal Puppets

You will need: Construction paper, assorted colors, wood craft sticks, white yarn, The Park Easy Pack

From one sheet of 9 x 12 construction paper, cut strips, lengthwise, about 1 to 1 $\frac{1}{2}$ inches wide. This would give you about 6 strips. Fold over the ends of each strip to make a circle and link the second circle through the first, etc., to make a chain for the body and head of your animal. Use the glue stick to glue the ends as you go.

Use scraps of paper in other colors or markers or crayons to make the features on your animal.

Cut 12 inches of yarn to make the craft stick top. Hold the 2 craft sticks, crossing in the center and wind the yarn around this center to hold it in place. Knot the ends.

Cut 4 more 12 inch pieces of yarn and tie one end onto the ends of the craft sticks and the other ends attach to the puppet head and body. This will make the puppet move.
