

W13465 Easy Net and Post Instructions

Contents:

- 1 – Net
- 2 – Clamps
- 2 – “L” Brackets
- 2 – Washers
- 2 – Thumb Screws

Take one “L” bracket, a clamp, washer and thumb screw and align as shown in the image to the right. Make sure the thumb screw is aligned with the threaded hole in the clamp.

Tighten the thumb screw to secure the “L” bracket to the clamp to create a net support.

To attach the net support to a table, loosen the screw at the bottom of the clamp and slide it over the table. Tighten the screw to secure it to the table. Attach the other net support to the opposite side of the table and slide the metal ends of the net over the brackets. To tighten the net, loosen the thumb screws on the net support, slide the “L” brackets in or out as needed and then re-tighten.
