DIY Glittery Slime Making Easy Pack

PLEASE READ ALL INSTRUCTIONS BEFORE STARTING

YOUR KIT CONTAINS:

- Color Splash!® Clear Glue - 128oz
- Elmer's Magical Liquid - 32oz
- Color Splash! Glitter Assortment – set of 6
- Color Splash! Liquid Watercolors – set of 6
- Slime Storage Containers w/lids – set of 24

YOU WILL ALSO NEED:

- Measuring Cup (4oz)
- Measuring Teaspoon
- Spoons or Craft Sticks for stirring
- Covered work surface

Optional Supplies for Slime Variations:

- Color Splash! Glitter Glue (PT3049) - try this for ultra-glittery slime!
- Color Splash! White Glue – make interesting opaque slime that can also be tinted with the Liquid Watercolors and sparkled with glitter
- Sequins or other add-ins to add to the tactile experience!

Get ready for colorful, sparkly fun! Follow these simple steps to create glittery slime using Color Splash! Clear Glue, Elmer's Magical Liquid, vibrant Color Splash! Liquid Watercolors and Color Splash! Glitter.

---

Please read through all steps prior to starting slime making.

**IMPORTANT NOTE:** If you are using Liquid Watercolors to make colored slime, be sure to protect clothing and surfaces as these highly concentrated colors can stain. Adult assistance or supervision is advised when using Liquid Watercolors.

**Step 1: Gather Your Ingredients.** Assemble all the materials needed for your slime making adventure. Cover work surface to protect against spills.

**Step 2: Let The Fun Begin!** Start by pouring 4-oz of clear glue into one storage container for each slime maker.

**Step 3: Add Glitter for Sparkle.** (if desired) Sprinkle your chosen glitter colors into the container with the glue. The more glitter you add, the more sparkle your slime will have....but start out small as a little can go a long way. Mix the glitter and clear glue thoroughly for an even distribution.

**Step 4: Tint Your Slime with Liquid Watercolors.** (if desired) Keep your slime clear or select your favorite liquid watercolor to give your slime cool transparent color. Add a drop of liquid watercolor to the clear glue and glitter mixture. Again, as with the glitter, add sparingly as this color is very concentrated and you don't need much to achieve beautiful colors. Stir until the color is evenly distributed and you achieve the desired hue.

**Step 5: Add the Elmer's Magical Liquid.** This is where the magic happens! Pour Elmer's Magical Liquid into the mixture starting with a couple of teaspoons while stirring continuously. Keep stirring until the slime begins to thicken and form. If your slime seems too "sticky", add more Magical Liquid, a teaspoon at a time as needed, until you reach your desired slime consistency.

**Step 6: Knead and Play!** Once your slime has formed, take it out of the container and knead it with your hands. The more you knead, the smoother and stretchier your slime will become. Enjoy the sensory experience of playing with your colorful, glittery slime. It will feel cool and almost "wet" to the touch but your hands will dry quickly.

**Step 7: Store in the Slime Container.** After playing, store your slime in the airtight container to keep it fresh for future fun. Make sure to secure the lid tightly to prevent drying. If properly stored, the slime will last for weeks!

**TIPS:**

Experiment with different glitter combinations and liquid watercolor shades to create unique slime variations. Tint two batches of slime using different colors and then combine them for fun swirly slime!

Experiment and get creative with your slime – use white glue or glitter glue (in the same proportions as the recipe above) for different effects. Try adding sequins, small glass beads and other mix-ins for fun textured slime.

**Always wash your hands before and after playing with slime.**
