Color-Me™ Snow Globe

PLEASE READ ALL INSTRUCTIONS BEFORE STARTING

TO FILL SNOW GLOBE WITH WATER:

1. Twist off the black base and remove small "plug" from the base of the snow globe.
2. Carefully fill the snow globe with water through the hole. We recommend either filling it using a thin stream of water in a sink or create a small funnel by rolling a piece of paper into a funnel shape.
3. Insert your artwork (see below) in the slot.
4. Replace plug and twist the black base back on the snow globe. Shake and watch the snow fall!

TO ASSEMBLE THE SNOW GLOBE PAPER:

1. Each snow globe should get 2 pieces of paper and 1 foam insert. Using the 2 papers, create 2 different pieces of artwork for your snow globe. We recommend using markers, colored pencils or crayons (sold separately). Then layer 1 paper, the foam insert and 1 paper together and carefully slide this into the slot.

TIPS AND IDEAS

- You can use the paper shape as a template and trace/cut the shape from a photograph!
- Trace the paper shape onto a piece of cardboard and cut the shape out. Use tiny treasures to build a collage (papers, gems, stickers etc.) and layer this on the cardboard. Let dry and carefully insert this into the snow globe slot, without using the foam insert.
