### PREP INSTRUCTIONS:

1. Remove any dirt, dust or oil from the metal coasters so the grout will set properly. You can do this with glass cleaner and a paper towel or just wash them with dish soap and hot water.
2. Mix grout using plastic bowl and spoon. Add enough water to the grout powder to make a smooth thick paste, free from lumps. Let stand 15 minutes and remix before using. **NOTE:** Mix only the amount of grout that can be used in one hour. Mix additional batches as needed, you will have extra grout powder.

### INSTRUCTIONS:

1. Trace the circle coaster shape onto scrap paper and lay your tile design out on the paper so you don't have to move the tile again.
  2. Using the plastic spoons, spoon enough grout into the metal coasters until they are approx.  $\frac{3}{4}$  of the way full.
- TIP:** Don't overfill the coaster base, as the grout will spill over the top when you press your tiles into place.
3. Press your tiles into the wet grout following your design.
  4. Once all your tiles are in place put your coaster aside to set for at least 12 hours or until the grout is hard and completely dry.
