

## S&S® Toss 'n Talk-About® Addition Ball

The rules are simple and can be easily modified to fit individual use and/or functioning levels. Start the game by having players toss the **S&S® Addition Ball®** back and forth. When the ball is caught, the player responds to the equation under his or her right thumb by stating the correct answer, and then tossing the ball to another player. If the player's thumb is touching more than one equation, the player may choose which equation to solve.

### Variations:

1. Have players choose any member of the group to answer the equation.
2. Use the equations under both thumbs to double the fun.
3. More fun than musical chairs! Keep the ball moving from player to player while the music is playing. When the leader stops the music, the player holding the ball is the one to have a turn.
4. Create teams or partners and when a player catches the ball, it is the partner or team members who are responsible for answers to the equations.
