GP3093

PREPARATION INSTRUCTIONS:

1. It is easiest to punch out the pieces from the foam sheets ahead of time. Make a pile of balloon shapes, a pile of basket shapes and a pile of foam squares in the center of the work surface. Keep the punched out sheets.
2. Pre-cut the kite string into pieces and put with the foam pieces.

INSTRUCTIONS:

NOTE: This project “sandwiches” the string in-between the foam pieces. Follow the steps carefully.

Have each person:

1. Decide on his/her foam color combinations.
2. Lay the balloon shape and basket shape for the back of the project on the work surface with the self-adhesive side up. DON'T peel the paper off yet.
3. Take a piece of kite string and fold it in half. Lay the kite string on top of the balloon/basket pieces with the center loop sticking above the top of the balloon shape approximately 4". The ends of the kite string should lay on top of the basket piece. Each person can adjust how long he/she wants the basket to hang below the balloon. Just trim the kite string with scissors.
4. Remove the kite string off the foam pieces. Peel off the paper on the foam balloon and basket pieces with sticky side up.
5. Reposition the kite string similar to Step 3.
6. Peel off the top balloon and basket pieces and carefully match them to their respective bottom foam pieces. Press the pieces together.

NOTE: The foam is really sticky. If pieces are not lined up, it is hard to reposition.

7. Decorate both sides of the balloon with the foam squares. You can also use the leftover foam from the diecut sheets to cut shapes and lines to add to the balloon and the basket.

TIP: Refer to the finished photo for assembly.
