INSTRUCTIONS:

NOTE: There are some small areas of the designs that need to have the top layer of paper peeled off. This can be tricky for some kids and they may need some extra adult help.

1. Starting with an outside shape, peel off the top paper to expose the adhesive. Choose a color of foil leaf that you want the shape to be, and carefully lay that flat on the adhesive. Press lightly with your finger over the foil to have it stick to the adhesive, and slowly pull off the foil leaf sheet.

TIP: If there are areas that the foil did not adhere to, simply press down the foil leaf sheet to those areas and rub with your finger, then slowly pull off. You can also change the colors of the foil to make different textured areas which can look neat – especially in the larger foiled areas.

2. Repeat step one with the other remaining shapes, building your foil leaf animal design. Remember to think about your color choices **BEFORE** you put the foil leaf on the adhesive!

NOTE: The foil leaf sheets should be used multiple times until all of the color is gone from the sheet.

Fun! Facts! Eye-Opening Art

- The first lead pencil, the earliest form of self-expression, was invented in England in 1565.
- Famous “cubist” artist Pablo Picasso loved animals. Through his adult life he owned a pet monkey, an owl, a goat, a turtle and packs of dogs and cats.
- Leonardo da Vinci, the original “Renaissance Man,” spent 12 years painting the Mona Lisa’s lips.
