Perching Parrot (Pk/24)

PLEASE READ ALL INSTRUCTIONS BEFORE STARTING

YOUR KIT CONTAINS:

- Foam Sheets with a strip of adhesive on 1 side
- Shapes on adhesive 1-sided foam sheets
- Wing shapes on adhesive 2-sided foam sheets
- Wiggle Eyes
- Chenielle Stems
- Feathers

AGE GROUP: 6 and up

PROJECT TIME: 45 minutes

EACH PERSON SHOULD HAVE:

(All in colors of his/her choice)

- 1 foam sheet with adhesive strip
- 1 pair wiggle eyes
- A chenille stem

The assorted foam shapes and the feathers will be shared among the group.

INSTRUCTIONS:

TIP: Refer to finished sample photo as needed.

1. Create a tube out of the foam sheet: peel off the paper to expose the adhesive strip to hold the tube shape together. This will be the parrot body.
2. Poke the end of the chenille stem about ½" from the base of the tube and push through the inside of the tube, through the foam. The 2 ends of the chenille stem should be sticking out of the tube, 1 on each side.
3. Choose a pair of wing shapes and peel the paper off 1 side of each wing. Press feathers into the adhesive to make your feathered parrot wings.

Fun! Facts • Eye-Opening Art

- The first lead pencil, the earliest form of self-expression, was invented in England in 1565.
- Famous "cubist" artist Pablo Picasso loved animals. Through his adult life he owned a pet monkey, an owl, a goat, a turtle and packs of dogs and cats.
- Leonardo da Vinci, the original "Renaissance Man," spent 12 years painting the Mona Lisa's lips.

4. Peel off the paper on the other side of the wing shape and press wing onto the parrot body wherever you want.
5. Use the assorted adhesive foam shapes to add details to your parrot, peeling the paper and sticking the shapes as you want.
6. Peel paper off the backs of the eyes and press into place.
7. Place your finished parrot on your wrist and twist the ends of the chenille stem together so your parrot "perches" on your arm!
