GP1586

INSTRUCTIONS:

Instructor:

1. Place the soil pellets in a large pan or pail. Expand the soil pellets by adding 1 cup water for each pellet. Wait for expansion to occur. You may want to add more water if the soil is too dry.

Participants:

1. Decorate your pot by cutting out the stickers and coloring them. Stick them to the pot as desired.
2. Fill your pot 1/2 full with soil. Moisten the soil and add more if necessary.
3. Sprinkle seeds on top of the soil to lightly cover the entire surface.
4. Sprinkle a small amount of soil on top of the seeds and water until soil is damp.
5. Place the pot in a sunny spot and keep moist. Your grass will begin to sprout in 3 to 4 days.

Helpful Hint: Try to keep the stickers dry when watering the grass or the markers will run.
