**INSTRUCTIONS:**

1. Apply a small dab of glue in the hole in the front of the large piece of wood. Insert the small wood dowel piece into the hole.
2. Screw the screw eye into the pre-drilled hole on the top of the long wood piece.
3. Run a bead of glue across the bottom of the long wood piece and press this onto the top of the large piece of wood. Refer to finished photo as needed.
4. Let dry completely.
5. Paint or stain the bird-feeder. Let dry and apply an outdoor sealant/polyurethane. Let dry.
6. Thread the jute through the screw eye and knot to create a hanging loop. Your bird feeder is assembled!

Adding the fruit/bird-seed to the feeder:

Hold your peanut butter/bird-seed coated apple or small fruit in the center of the large hole. Carefully push the metal skewer through the hole in the side of the wood, through the fruit and then into the other hole in the wood. Hang your feeder outside and watch the birds!
