Hot Shot Basketball (Pk/50) Baloncesto Para Campeones (Pk/50)

PLEASE READ ALL INSTRUCTIONS BEFORE STARTING
FAVOR DE LEER LAS INSTRUCCIONES ANTES DE COMENZAR

YOUR KIT CONTAINS:

- Basketball Backboards
- Pipe Cleaners
- Foam Basketballs
- Net Material
- Markers
- Tableros de Baloncesto
- Limpiadores de Pipa
- Bolas de Baloncesto de Espuma
- Material Para la Malla
- Marcadores

YOU WILL NEED:

- Pencil
- Glue
- Scissors
- Ruler

USTED NECESITARÁ

- Lápiz
- Pegamento
- Tijeras
- Regla

AGE GROUP: 7 and up
PREP TIME: 15 minutes
PROJECT TIME: 60 minutes

EDADES: de 7 y mas
TIEMPO DE PREPARACIÓN: 15 minutos
TIEMPO DE PROYECTO: 60 minutos

PREP INSTRUCTIONS:

1. Use a ruler to measure and cut 25 12" pieces of net material. Fold the material in half and cut so you have 50 pieces, approximately 3x12" each. There will be extra netting left over.
2. Cut 50 pipe cleaners in half.

INSTRUCTIONS:

1. Plan and draw a design on the backboard using a pencil.
2. Use markers to color in your design. Let dry.
3. Place the 12" piece of netted material on the work surface and thread one pipe cleaner along the top (the long side of the netted material). Go over and under every two holes (see Figure A).
3. Take one of the pipe cleaners that was cut in half (save the other half for the other side) and hold the short side of the netted material behind the backboard and carefully align the holes (see Figure B).

FIGURE A

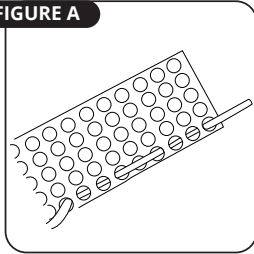

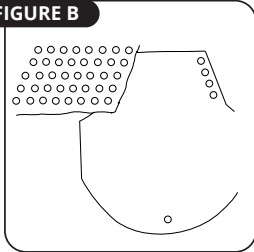

FIGURE B

Helpful Hint: Align the top corner hole of the netted material to the first hole on the backboard. The netted material may be longer than the bottom of the backboard.

INSTRUCCIONES DE PREPARACIÓN:

1. Use una regla para medir y cortar veinticinco (25) 12 "piezas de material de la red. Doble el material por la mitad y cortar por lo que tiene 50 piezas, aproximadamente 3x12 "cada uno. Habrá adicional malla sobrante.

2. Corte 50 limpiadores de pipa a la mitad.

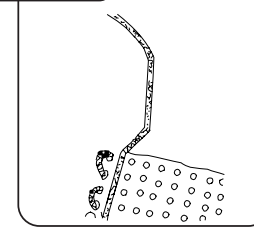

INSTRUCCIONES:

1. Planifique y dibuje un diseño en el tablero del canasto utilizando el lápiz.
2. Utilice los marcadores para colorear su diseño. Deje secar.
3. Ponga un pedazo de 12 pulgadas del material para la malla sobre la superficie de trabajo y ensarte un limpiador de pipa en el borde superior (del lado largo). Inserte por encima y por debajo dejando dos agujeros por el medio. (Vea la figura A)
4. Tome uno de los pedazos de limpiadores de pipa que cortó a la mitad (guarde la otra mitad para el otro lado) y coloque el lado corto del material para la malla detras de lo que será el tablero del canasto y cuidadosamente alínie los agujeros (Vea la figura B).

Ayuditas: Alínie el agujero de la esquina de arriba del material para la malla al primer agujero de la tabla del canasto. El material para la malla puede ser más largo que la parte inferior del tablero.

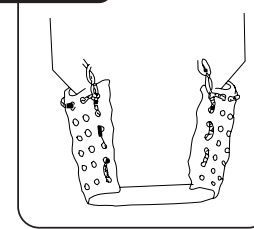

5. Thread the pipe cleaner, starting from the back, through the netted material and backboard (see Figure C). Lace pipe cleaner down one side of the backboard.

FIGURE C

6. Twist ends behind backboard (see Figure D).

FIGURE D

7. Bring the netted material across the front of the backboard and repeat steps 4-6 (see Figure D).

5. Ensarte el limpiador de pipas, comience de atrás hacia adelante del tablero y del material para la malla (Vea la figura C) continúe por todo el lado del tablero.

6. Tuerza las puntas del limpiador de pipas atrás del tablero (Véa la figura D).

7. Traiga el material para la malla por el frente del tablero y repita los pasos 4 al 6 (Vea la figura D).
