

Peppermint Lip Balm Kit

S&S Worldwide, Inc. #GP3348

Experience Level: Beginner

Project Time: 45 minutes

Age: 10+

Makes: 24 Peppermint Lip Balm Tubes

Your Kit Contains:

- 24 Lip Balm Tubes/Caps
- Lip Balm Base
- Stirring Spoon
- Peppermint Oil
- Labels for the finished tubes

You Will Need:

- Microwave safe measuring cup with a pouring spout (glass is preferred)
- Metal spoon
- Access to a Microwave
- Paper Towels

Instructions:

1. Use the metal spoon to scoop about $\frac{1}{2}$ of the lip balm base in pieces and place into measuring cup.
2. Heat lip balm base in microwave at 50% power until melted.

Idea: If you want to tint your lip balm, stir some pieces of a new matte lipstick into the melted base.

3. Add about half of the peppermint oil into the melted base and stir with stirring spoon.
4. Pour almost all the flavored base into the tubes and allow them to cool until solid. Sometimes the lip balm base will sink in the middle as it cools.
5. Reheat the base left in the measuring cup and top off tubes as needed.
6. Repeat steps 1-5 with the additional lip balm base to fill all 24 tubes.
7. Cap the filled tubes and wipe down the tubes with paper towels. If there is lip balm on the outside of the tube, use a paper towel dampened in hot water to clean the tube.
8. Apply the labels. Make sure to align the label perforation with the seam where the cap meets the tube (refer to finished sample photo).
