

# W15359 Ball Rack Plus – Assembly Instructions

## Contents:

20 – M6X30 Socket Head Cap Screws

8 – Horizontal Bars

2 – U- Shaped Ends

2 – U-Shaped Wheel Holders

2 – Removeable Wire Storage Bins

1 – Hook Attachment

1 – Loop Attachment

4 - Wheels (2 locking and 2 non-locking)

1 - Wrench for wheels

1 - Socket Wrench

## Instructions:

1. The Hook Attachment and Loop Attachment Pieces can be attached at any of the 4 horizontal storage levels. They are shown at the 2<sup>nd</sup> from top in the image. The top level allows for longer objects (like jump ropes or hula hoops) to be hung. Determine which level you want these attachments to be located.

1. Attach 8 horizontal rods and the Hook Attachment to a U-Shaped end with an M6X30 Socket Head Screw. Finger tighten.

2. Connect the Loop Attachment to the opposite U-Shaped End along with the 8 horizontal rods with 8 more screws. Finger tighten.

3. Thread a wheel into each of the ends of the U-Shaped Tubing for the wheel holders. Use the wrench to fully tighten.

4. Attach a U-Shaped Wheel Holder with the wheels attached to each U-Shaped End at each end of the cart using 2 Socket Head Cap Screws. Be sure all 4 wheels are resting on the ground and then fully tighten all 20 screws.

5. Depending on how the cart will be used the Wire Storage bins can be inserted at any of 4 horizontal bar levels or left to the side to allow for more large ball storage.
